

## 2001 CPT Code Changes

Pathology Associates Medical Laboratories provides CPT codes in an effort to offer some guidance for our clients. The CPT codes listed reflect our interpretation of CPT coding requirements. It is our clients' responsibility to determine the correct CPT codes for billing use and to verify the accuracy of the codes for the tests actually performed. PAML assumes no responsibility for billing errors due to reliance on the CPT codes listed. For further reference, please consult the most current edition of the *CPT Coding Manual* published by the American Medical Association. If you have any questions regarding the use of a code, please contact your local Medicare carrier or fiscal intermediary.

The following CPT codes are effective April 1, 2001.
